

You're the Judge

The International Wheat Agreement

In this column last week reference was made to the speech delivered by Premier Bennett on his return to Canada from the World Economic Conference and International Conference of wheat exporting and importing nations. Important facts, figures and general information affecting the world wheat situation were presented, all of which had a bearing upon and led up to the entering into of an agreement by twenty-one nations vitally interested either as exporters or importers of wheat designed to advance the common interests of all.

Inasmuch as there is no question of more vital importance to the people of Canada, and more particularly of Western Canada, than wheat, we propose to supplement last week's article by a further reference to the subject. Statistics compiled covering a long period of years go to establish the fact that when the wheat producers of the world are prosperous—that is, when the price of wheat is high enough to return a fair profit to the farmers raising it—industry generally throughout the world is likewise prosperous. In other words, wheat is shown to be the barometer of prosperity. Naturally so, because it is the standard food of the great bulk of the human race.

First, we recite the terms of the new international wheat agreement: The chief wheat exporting nations, that is Canada, Australia, Argentina and the United States, agree to limit their combined exports of wheat in the crop year August 1, 1933, to July 31, 1934 so that the total world exports of all countries shall not exceed 560,000,000 bushels. On this amount Canada's export allotment is 200,000,000 bushels.

These four countries further agree that during the following crop year August 1, 1934, to July 31, 1935, they will limit their exports of wheat to maximum figures 15 per cent. less than the average yield and average acreage sown during the period 1931-1933 inclusive.

The minor wheat exporting nations, that is Bulgaria, Hungary, Roumania and Yugoslavia agree to limit their combined wheat exports in both the crop years 1933-34 and 1934-35 to 50,000,000 bushels.

While Russia entered into no definite agreement as to restrictions on wheat production or exports it did agree to enter into further negotiations governing exports.

On the other hand, the importing countries:

(1) Agreed not to encourage any increase in the area sown to wheat in their respective countries.

(2) Agreed not to take any governmental measures the effect of which would be to increase the domestic production of wheat.

(3) Agreed to adopt every possible measure to increase the consumption of wheat.

(4) Agreed to the removal of measures which tend to lower the quality of breadstuffs, and thereby decrease the human consumption of wheat.

(5) Agreed to lower their customs tariffs on wheat when the world price reaches and maintains for a specified period an average fixed price.

Finally, an International Wheat Advisory Committee was set up, representative of both exporting and importing countries, to watch over the working and application of the agreement.

Such is the new international agreement governing wheat production and export. It is one concrete outcome of the World Economic Conference. Whether it will prove practical in its operation and satisfactory in its results time alone will decide.

It involves the export of wheat on the part of Canada, and was hitherto the case in normal years. Consequently, it involves the raising of less wheat, and the putting of a stop to further increases in wheat acreages and production. For the crop year 1933-34 this reduction is 15 per cent. below the average for 1931-33.

Immediately the Dominion government on restrict exports to any figure it may like. That is entirely within its control. But how can that Government limit production? In the United States it is being attempted by paying a bonus to farmers to reduce their wheat acreage. The said bonus is to be paid out of a fund created by imposing a special tax on all wheat consumed in the United States. In other words, consumption is being offered the U.S. farmer. It is reported from Ottawa that this idea does not meet with favor nor much support there.

It is further reported from Ottawa that the Federal Government does not intend to apply any compulsion to bring about a 15 per cent. reduction in wheat acreage, but will rely on a national campaign among farmers, aimed to encourage and bring about voluntary reduction by them. Will the farmers respond to such a campaign? And if certain farmers are willing, and certain farmers are not, will the result be? If one farmer reduces 15 per cent. and another increases 15 per cent. the country will be in exactly the same position. If one set of farmers decide to reduce 15 per cent., even if they do not increase their wheat acreage, the result will be? If one farmer reduces would have to reduce 30 per cent. in order to bring about an average 15 per cent. reduction.

Then, it is to be noted, that the 15 per cent. reduction in 1933-34 is to be from the average yield and acreage sown in 1931-33 inclusive. But tens of thousands of Western farmers and millions of acres of land produced little or nothing in these years. They must be allowed to produce as largely as possible in 1933-34 and 1934-35 in order to repay their heavy losses in these disastrous years. If they are to be allowed to do this, the total production of wheat is to be reduced by 15 per cent. It seems inevitable that those farmers who had fair crops in the period 1931-33 must decrease their wheat production by very much more than 15 per cent.

And what, it will be asked, is to be done with the acreage taken out of wheat production? It is to be used for other crops, and it is to be allowed to lie fallow? They cannot afford to let it lie to weeds. Will the result not be to increase the cost of other crops? Will the result not be to increase the cost of grain over and above domestic and export demands?

Without attempting to speculate on the effect which weather conditions will inevitably have on crops or failures in crops, it is to be noted that the situation, which of course are beyond all human control—no further question arises: If production is not decreased while at the same time exports from Canada are restricted, and it is known that the surplus pile up on the farms or heavy carry-overs are built up in the elevators, what will the effect of such surplus pile up on the world price? It is to be noted that the great large carry-overs have depressed and continue to depress prices. What hope is there of a rise in international prices, and a consequent lowering of tariffs by importing countries, if available wheat supplies are so restricted to demand?

Then, too, there is the question as to the effect this new international agreement—with its provision for reductions of customs duties by importing nations when the price rises, upon the existing agreement between Great Britain and Canada whereby, and it is known that the surplus pile up on wheat while admitting our wheat free. The effect of this is to depress the price of foreign wheat, and it is to be noted that the surplus pile up on the world market before the provision of the new international agreement become operative under which the importing nations undertake to reduce their customs tariffs against wheat. That of Canada included.

Summer Campaign Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it seizes you it is going to end. Let it run for a day or two and how weak and groggy it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Bowler's Extract of Wild Strawberry and you will quickly be well again.

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

Carnivorous Plants

Trap Insects With Lightning-Like Rapidity In Snapping Mussels

New light was cast on mysterious workings of the snapping mussel, a type of carnivorous plants, Prof. F. E. Lloyd, president for 1932-33 of the Royal Society of Canada, in his presidential address to the botanical section of the British Association for the Advancement of Science, recounted his observations of some 75 species of the shadowed type of plant that snatches its food from air or water.

The professor of botany at McGill University, Montreal, contributed a highly technical paper which he labelled a continuation of his review of carnivorous plants.

The address set out the details of the structure of the "door" which the flesh-eating aquatic or terrestrial plant slams shut on such unfortunate small insects as may come wandering within reach. Supered-motion pictures, Prof. Lloyd related, had disclosed the hungry bladderwort opened the fatal door in 1-140 second, completing the whole operation inside 1-16 second. Included in the 75 types in Prof. Lloyd's summary was the purple bladderwort found growing in the vicinity of Montreal.

Foresees Highway From Argentine To Alaska

California Map Confident Road Will Be Built

Motorists of the future may be able to drive from Buenos Aires, capital of the Argentine Republic, to Fairbanks, Alaska, on the International Pacific Highway, according to Ernest McGuffey, manager of the magazine titled the Automobile Club of Southern California.

Mr. McGuffey is confident that the much-talked-of British Columbia-Alaska Highway will be built, and that it will be a component part of the international road by means of which it is proposed to link North and South America.

Within the next five years, Mr. McGuffey said, part of this international highway would be completed between Nogales, on the border of Arizona and Sonora, and Mexico City.

Old Newspaper Changes Hands

Saskatchewan Record Was Founded 48 Years Ago

The Saskatchewan Record, weekly publication founded 48 years ago by the late James Stewart and carried on by his son, Robert, has been sold by his daughter, Mrs. Margaret L. Colebush, to Mr. J. H. Taylor, who has been a member of the Record staff for the past ten years, and W. H. G. Taylor. The management of the paper has been the property of Mrs. Colebush for six years, owing to her father's illness, part of the time, and his active engagement with another newspaper enterprise in the same part of the province. The new owners announce a policy of independence in politics.

Willing To Help

For months he had been his devoted admirer. Now, at long last, he had screwed up sufficient courage to ask the most momentous of all questions.

"There are quite a lot of advantages in being a bachelor," he began, "but there comes a time when you long for the companionship of another being—a being who will regard you as a perfect woman who can treat as one's absolute property, and who will be kind and faithful when times are hard;—who will share one's joys and sorrows."

"You don't think of buying a dog," he said. "I think of it. I do. Let me help you choose one."

Many Life-Guards

On the 4½-mile beach which limits the seaside resort to Portmouth 500 volunteer life-saving guards have just been sworn in. That is, the town is to respond to a campaign for safety bathing, following scores of drownings this season.

Where Photographs Are Barred

Photographs have been barred from Yemen, in Southeast Arabia. The Imam has ruled that anyone having one of the sound prophetic pictures must be dealt with severely. He also has issued another law imposing a tax on every man who shaves his head.

Canada has been the leading exporter of flour to the Trinidad market for many years.

A bee's sting is one-third two feet in a inch long. The other two feet is imagination.

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know of this woman's experiences. Advice from a doctor who has seen several attacks is advice worth having. She writes:

"I suffered from indigestion, gas, flatulency and constipation, and was so very ill, I had to (on medical advice) live on biscuits and milk for three months. Well, I friend advised me to take Kruschen and now I am pleased to say my troubles are ended. I can eat, and enjoy a good meal without any painful after-effects, my sleep is deep—in fact quite clear—and there is no sign of constipation. I would advise anyone suffering the same to take Kruschen."—(Mrs. M.H.L.)

The immediate effect of the six salts in Kruschen is to promote a natural flow of the digestive and other vital fluids of the body. Even after you start on Kruschen you will find that the food is easy to digest without any distressing after-effects. And as you persevere with the "little daily dose," you will see that the relief which Kruschen brings is lasting and reliable.

Decorative Radiator Caps

Detroit Jury Advises Abolition Of Bungalow Car Accessories

Nude figures, Greek goddesses and long-necked birds whose distorted forms adorn the radiator caps of automobiles, may soon disappear from Michigan if the recommendation of a coroner's jury is acted upon by the legislature.

The jury returned a verdict of not guilty in the case of a driver whose radiator adornment pierced the chest of a 75-year-old man who suffered a fatal stroke and died soon after the accident.

The recommendation was made by Coroner Albert A. Hughes when he viewed the radiator cap which caused the accident. It asked that the Legislature pass an act prohibiting the use of radiator embellishments which extend beyond the front of the radiator.

Dr. Hughes said that a number of recent fatalities have resulted because of these decorative radiator caps.

Supplies For Northern Port

Steamer Delayed By Storm Reached Craig Harbor Safely

A sudden lull of the northeast gales that howl over the ice pack surrounding the Arctic pole enabled the Hudson's Bay Company steamer "Nascoe" to drop supplies at Craig Harbor, Canada's far-northern police port. Wireless messages received at Ottawa by the department of the interior said the ice, high seas and driven snow held the boats off the harbor for several miles for three or four days until the storms abated sufficiently on Sept. 7 to permit unloading.

The steamer, carrying supplies to Royal Canadian Mounted Police posts in the Arctic, was at the northern apex of its patrol at Craig Harbor.

Saskatchewan Lumber Cut

Report For Last Year Gives Amount As 58,342,140

Although the amount of lumber cut in Saskatchewan during 1932 was considerably less than for the previous year, the majority of mills managed to operate at least part of the time, according to a bulletin of the department of railways, labor and industry. The total number of saw mills in operation in 1932 numbered 163. Thirty-four mills including some of the larger mills did not operate. The total number of lumber cut by the operating mills was 58,342,140 feet board measure.

For Hot Weather Use

London's commissioner of police is making tests of aluminum hats for policemen. A number of men on duty have been wearing helmets lined with aluminum foil which is said to make headgear extremely cool. If the tests prove satisfactory aluminum hats will be ordered for hot-weather use.

While a couple in America were playing golf a cyclone destroyed their house. But, after what does golfers say, "it was a house!"

In all half of Life Tom King, 63, convicted at Vancouver as the "window-breaking burglar" who has spent much of his years of his life in prisons throughout the country, has gone back to jail to serve another term of fifteen months for larceny.

Queen Queen Salewoman Queen Mary acted as a saleswoman at a bazaar at Aberdeen, Scotland, Aberdeen, Scotland, and sold all of her goods within an hour and a half. Her receipts were about \$675.

PILE SUFFERS

HAPPY RELIEF

MECCA'S PILE REMEDIES

Canada's Position In World Trade

Leads The World In Production Of Newspaper, Nickel and Asbestos

In the production of newspaper, paper, nickel and asbestos, Canada leads the world, according to the 41st annual report of the Canadian Government Department of Trade and Commerce, which surveys the fiscal year, ended March 31, 1933. It is also noted out in this report that the Dominion occupies second place in the production of gold and zinc; third place in the output of copper; and fourth place in the production of wheat, automobiles and lead. In the production of wheat in 1932 Canada was exceeded by Russia. The United States and China are copied.

In export trade the Dominion led the world in 1932 in the exports of wheat, printing paper, nickel and asbestos, occupied third place in exports of wheat flour; fourth place in exports of automobiles and wood pulp and sixth place in exports of rubber. The export of these staple products from Canada made up fifty per cent of the Dominion's total domestic exports. Canada also stands high in the exports of several other important staple products such as lumber and timber, fish, copper, barry, cheese, raw furs, meats, farm implements, automobiles, raw gold, silver, pyrite, rubber footwear, leather and hides.

A Palace Of Radio

Wireless Sets At Radio Exhibition In London Worth Millions

Wireless sets to the value of \$15,000,000 were installed at Olympia for the National radio exhibition and the huge exhibition halls were transformed into a palace of radio. In comparison with the radio exhibition the greatest feat was the erection of a concert hall, seating more than 2,000 people, where the British Broadcasting Corporation gave daily performances to enable listeners to see as well as hear their favorite wireless stars.

Half of the national hall was taken up for this. The other half was used for the post office exhibits. A novel feature was a post office complaint bureau, where any listener suffering from electrical interference or other form of wireless trouble was able to obtain free advice. One of the post office exhibits was a coffee grinder which produced hideous cracks in a food speaker when placed by a special general post office device.

Two hundred of Britain's biggest radio manufacturing firms exhibited. Foreigners were barred.

Shortens Cross-Channel Trip

Fifty-Minute Air Service From Liverpool To Isle Of Man

The Isle of Man has been brought within five hours of London, England, by a new service of the Royal Air Force from Blackpool and Liverpool to the island. It is now possible to leave London by train at 10-40 a.m., and arrive at the island by plane at 11 p.m., a saving of four hours.

The new service will be maintained by eight-seater aeroplanes, capable of making an hour, or four, or a cruising speed of 110 miles an hour. The cross-channel trip from Liverpool to the Isle of Man will take 50 minutes against the four or four and a half hours taken by steamer.

There will be a daily service of six crossings. The service will operate on Saturdays, and will provide the first Sunday communication ever established between the island and the mainland.

Right At That

A local schoolmaster was taking the names of the pupils in his class. "Now then, Smith," he said, "name me a poisonous substance."

William Smith, who was not gifted enough to supply of intelligence, thought deeply.

"Aviation," he replied, after a while.

The class listened with amusement and the master looked sternly at the boy.

"Explain yourself, Smith," he snapped.

"One drop will kill, sir," replied Willie.

In All Half of Life

Tom King, 63, convicted at Vancouver as the "window-breaking burglar" who has spent much of his years of his life in prisons throughout the country, has gone back to jail to serve another term of fifteen months for larceny.

Queen Queen Salewoman Queen Mary acted as a saleswoman at a bazaar at Aberdeen, Scotland, Aberdeen, Scotland, and sold all of her goods within an hour and a half. Her receipts were about \$675.

Up-Side-Down Flying

Italian Ace Describes Feeling In Three-Hour Trip

Sitting in a Chicago hotel, breakfasting on a musketeer and coffee, Lieut. Tito Falconi told of his experiences in making a new world's record for up-side-down flight. His latest wrong-side-up flight was from St. Louis to Joliet, Ill., a trip that took three hours and seven minutes because of the slow speed rate that this type of flying requires.

"It's a swell feeling when you turn 'right around,'" said Falconi. "It's like getting well after you've been sick."

Asked if a sensation of dizziness overtook him the aviator replied: "Ah, no. The only sensation is one of pain because of the constant weight on one's shoulders. In this method of flying the pilot is held in the ship by straps which fasten around the shoulder, and the sensation felt is the same one gets from carrying any, a 150-pound weight in a basket hanging from the shoulders."

The most thrilling experience in Falconi's trip, he said, was in the last part of the trip when he righted the strap gave way about an hour out. He was dropped half way out of the cockpit, his goggles were torn away by the terrific wind, and he was unable to see. An added peril was the fact that he did not wear a parachute. His weight, too, great a handicap in the suspended position.

Egypt Buys British Planes

Said To Be Used In Fight Against Drug Traffic

A firm in Manchester has received an order from the Egyptian government for ten aeroplanes of the Avro 504 type. The type is a development of the "Tutor" type, an order for 300 of which was placed with the firm a year ago by the British air ministry, on the fulfillment of which the Newcom Heath works are still engaged.

The type is one on which pilots can be trained in every branch of military flying, including light flying and bombing.

It is reported that the machines are to be used in the Egyptian government's fight against the drug traffic. The machines are admirably adapted for long-distances patrol work, and have machine-gun, wireless and photographic equipment, and each carries a pilot and a navigator.

Gas In The Stomach

Gas in the stomach, belching, sour water, breath, pain after eating, etc., can be overcome within three minutes if you will take a little Bismarck Magnesia in water after you eat. The original Bismarck Magnesia is the only one that can get at any drug store will correct acid stomach and stop acid indigestion immediately. Try it and see.

Ready For Distribution

Saskatchewan Salt From Simpson Well Ready On Market

The first shipment of Saskatchewan salt, taken from the Simpson salt well, is ready for distribution. More than seven years ago a company was formed to develop the salt, and after several years of work, the salt was being vaporized into salt by the Simpson Oil Company.

A well is being drilled about one and a quarter miles east of the salt well, where it is hoped to tap gas, to be used at the salt well for vaporization. With the profits from the salt the company will continue its search for oil in the area, and it is hoped that gas will be found.

Tea Restriction

Protection Afforded Tea Grower Results In Higher Prices

In April a restriction was placed on tea exports from Ceylon, India, and Java, in order to raise prices to growers. The price, for almost four years, had been suffering devastating losses. Higher prices were realized, not only at the gardens, but also here on our own markets, and many packages of tea are now being sold at prices which are as high as they were a few months ago. Some of the finer quality brands are as yet unchanged, however, and are, consequently, even better value than at last April.

Taking Second Place

The time-honored onion has finally lost its grip on Bermuda. Agricultural statistics for 1932 show that for the first time the Bermuda onion is playing second fiddle to other vegetables in number of crates shipped from the island. Potatoes leading by a score of 20,881 to 20,861. Carrots also passed onions this year with a grand score of 24,890 crates.

Grab Bag Buying

Remember your kid days. . . when you went to a bazaar or fair of any kind there was always a grab-bag—one of those mythical things you reached into and drew out a whistle, a lollipop, a doll or a toy of some kind. You never knew what you were going to get—but that was half the fun. You didn't care.

But now when you buy anything you want to be sure what you get. You can't take chances on grab-bag methods. You must know that your purchase will fit your need. But do you?

There is one way you can be reasonably sure of everything you buy. Buy advertised products. Look through the advertisements in this paper. They will give you the information necessary to intelligent buying. They will tell you what is new and best and why it will suit you.

Advertisements are a form of introduction from the manufacturer or merchant to you. It is to your interest to read them.

The Call,
Gleichen,
Alberta

Town & District

The Crown Lumber here have been busy lately improving their property. The fence around the yard has been taken down and replaced and painted. This has made a decided improvement in the appearance of the place.

A Gleichen man says that ever since the world began man has tried to find something women would refuse to wear. Their efforts appear to have gone unrewarded!

Rally Day services in the United Church last Sunday was well attended.

L. Woods of the Drumheller Review spent the week end in town visiting relatives and friends. He says there is no place like Gleichen.

The Gleichen Branch of the Canadian Legion, B.E.S.L. are putting on a dance in the M.L.O.O.F. hall on Friday October 6th. The Legion members state that they have engaged a good peppy orchestra for the occasion and a good time is assured to all who attend.

A town resident appeared in court one evening last week under the charge of allowing cows to run at large. The case was dismissed with a warning and the next case which comes up under this charge will be dealt with severely. The town bylaws state that animals are not allowed to be picketed or grazed inside of the town and all owners of cows should take notice of this and govern themselves accordingly. The town council intend to see that the terms of the by-law are carried out.

Raymond sugar factory has opened for operations for the 1933 season. The prospects are that the crop of sugar beets will reach last year's record crop of 150,000 tons.

Chas. Clark, who founded the High River Times, at High River, many years ago, was this year elected to the presidency of the Canadian Weekly Newspaper Association, at the convention in Vancouver.

Alberta had, according to the 1931 census, a total of 41,310 head of purebred cattle in that year, compared with 40,063 in Saskatchewan, 17,919 in British Columbia, and 25,835 in Manitoba. Alberta was third among all provinces in this respect, and third also in respect of numbers of pure bred sheep, being led only by Ontario first and Quebec second.

The annual meeting of the Alberta members of the Canadian Weekly Newspapers Association, will be held at Edmonton, on Friday and Saturday October 29 and 31.

St. Andrews W. A. Thanksgiving tea in the Legion Hall, Saturday afternoon, October 7th.

Alberta has been experiencing a notable reduction in deaths from auto accidents in the past three years, according to figures just released by the federal bureau of statistics. In 1930 the province had 77 deaths, in 1931 there were 67 deaths, and in 1932 the record was 49. The latter figure compares with 59 in Nova Scotia, 49 in New Brunswick, 42 in Manitoba, 34 in Saskatchewan and 35 in British Columbia. Alberta's percentage of deaths per 10,000 motor cars registered in 1932 was 5.64 compared with 5.73 in Saskatchewan, 5.87 in Manitoba, 9.24 in British Columbia, 9.32 in Ontario, 18.77 in Quebec, 17.47 in New Brunswick, 12.15 in Nova Scotia. Alberta's percentage of 5.64 compares also with the Canadian percentage of 10.01.

MUNICIPAL DISTRICT OF BLACKFOOT NO. 218

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1925, the Municipal District of Blackfoot, No. 218, will offer for sale, by public auction, on the 19th day of October, 1933, at the hour of 1:30 o'clock in the afternoon, at the office of the Secretary-Treasurer, Gleichen, Alberta, the following lands:

Lots 21 to 40 inclusive, Block 14C, Plan 6753 A.D.

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificate of title.

Terms, cash. Redemption may be effected by the payment of all arrears of taxes and costs, at any time prior to the sale.

Dated at Gleichen, Alberta, this 13th day of July, 1933.

W. E. THOMPSON,
Secretary-Treasurer

The Gleichen Flour Mill

Best Ideal Flour milled by the Gleichen Flour Mill is a straight grade and consequently has higher protein contents and greater food value than First Patent Flour.

It has a slight creamy color when first ground but becomes perfectly white in a month or two as it bleaches naturally in the bag.

Keep a few months supply of Best Ideal on hand and you will always be sure of having a well matured flour of the very best quality in your home.
